

Challenges with launch of mobile data collection leads to better integration with Ministry of Health system in Zambia

Evans Mwananyambe
M&E Associate Officer, Access to Health Zambia
CMMB

CCIH 2023

HOPE IN HEALTH: OUR LABOR IS NOT IN VAIN

Mwandi, Western
Province, Zambia

CHAMPS: Children
And Mothers
Partnerships

Maternal and Child
Health

Problem: Data
Gaps

Initial Solution:
Mobile Data
Collection

Low network connectivity

Low knowledge amongst
Community Health Workers on
how to use the phones

Language barriers

Lack of repetitive mentorship

Decided to stop
the use of the
mHealth tool

Realigned the CHW
system to be
comprehensive

Adopted the MOH
comprehensive
community HMIS
tool

MOH are happy with the alignment

First ANC within 14 weeks increased from 30% to 55%

Skilled Deliveries increased to >95%

New technologies don't fit the context and government tools are more accepted, used, and aligned

THANK YOU!
